## TWO-ROLL MILL FOR MIXING POLYMER COMPOUNDS Model SSI 511 TRPFS

An ISO 9001:2008 Company  
GMP compliant

For preparing test sample from two or more materials, they have to be mixed homogeneously. The Two – Roll Mill with its two heated rollers, rotating in different directions, at slightly different speeds is an ideal machine for such a work. The test samples can then be obtained from the sheet by using Hydraulic Hot Press, Dumb-bell Dies etc. Two – Roll Mill is available in various models as per customer requirement.

### The Instrument consists of following:

- ✚ Two rollers mounted on a sturdy frame, rotating in different direction at slightly different speeds. Normal **roller Size 6" dia, 12" Length**.
- ✚ Two Energy Regulators for heating control – one for each roller. Heating by especially designed 'U' shaped heaters.
- ✚ **One 440 V – 3 phase. 3 hp Motor** with gear assembly for rotating the rollers.
- ✚ Forward \ Reverse Switch and power cord.
- ✚ Spatula for mixing the compound.
- ✚ Net weight of machine 200kg, Gross weight 275 kg, Box Size 145 x 115 x 145 (LBH in cm) (May vary slightly depending on the specification)

Actual Machine may vary from the one shown in photograph due to continuous improvement
